SUMMARY

Full Stack and Mobile Developer working across web and mobile in TypeScript, C# and Python. Responsible for the architecture, data modeling and release of two live SaaS products built on Autodesk Platform Services (APS), covering schema design, API integration, database performance and deployment. Experienced in delivering SaaS within the AEC/BIM industry, with an earlier background in ERP systems and business process design.

TECHNICAL SKILLS

LANGUAGES	TypeScript · JavaScript · C# · Python · SQL
FRONTEND	React · Next.js · Redux / Redux Toolkit · TanStack Query · React Router · Angular · Tailwind CSS · Bootstrap
MOBILE	React Native · Expo · iOS & Android
BACKEND	Node.js · Express.js · C# / .NET · Python · REST & GraphQL API design · MVC architecture
DATABASES & ORM	PostgreSQL · Supabase · MongoDB · MySQL · Redis · Prisma · Drizzle · Mongoose · Sequelize · RPC
DEVOPS	Docker · Docker Swarm · Kubernetes · Git · GitHub · CI/CD workflows
AUTOMATION & TESTING	Python scraping & ETL · Puppeteer · Jest
DOMAIN	Autodesk Platform Services (APS) · Design Automation · BIM / IFC workflows · Revit content pipelines · CRM & lead-generation

WORK EXPERIENCE

Full Stack Developer · Bimodel

06/2025 – Present · İzmir

- Designed and built two live SaaS products from the ground up, bimodel.net and Configira (configira.com), owning the architecture, data model and release across frontend, backend and cloud (Next.js, TypeScript, C#).
- Architected the Autodesk Platform Services integration in C#: server-side IFC/Revit model translation, an in-browser model viewer, and Design Automation pipelines that generate models in the cloud on demand.
- Built the manufacturer content platform on bimodel.net: upload and management tools, a searchable product catalog, and Revit/IFC content delivery to architects.
- Built Configira, turning a manufacturer's BIM library into configurable, project-specific models generated on demand through the Design Automation API.

Full Stack Developer · Freelance

06/2024 – 06/2025 · Remote

- Took on freelance web and mobile projects, choosing the stack to fit each brief.
- Built cross-platform mobile apps in React Native and Expo, and web apps in React, Next.js and Node.js with PostgreSQL and MongoDB.
- Worked both independently and as part of client teams, running projects from scope to delivery.

Full Stack Developer · Alme Tech

10/2022 – 06/2024 · İzmir

- Built and shipped a range of web and mobile projects to client requirements, taking each to production.
- Worked full-stack across the client and server: React and Next.js web frontends, React Native and Expo mobile apps, and Node.js, Express.js and C# / .NET back ends with PostgreSQL and MongoDB.
- Built REST APIs and integrated third-party services to fit each project's requirements.

Enterprise Resource Planning Specialist · Neli Engineering

04/2022 – 10/2022 · İzmir

- Worked on ERP implementations for external clients, helping set up new systems from the ground up around their operational workflows.
- Mapped clients' existing business processes into ERP module configuration and data structures.
- Built operational and management reports and supported client teams through go-live.

EDUCATION

M.B.A., Production Management and Industrial Business Administration
